MINIBANKER

Chubbsafes
Quality where it counts

MINIBANKER....

.....the ideal small cash safe

Looking for a small, high quality safe for protecting valuables? Well look no further. Manufactured to exacting standards, the 'Minibanker' offers both cash and fire protection. Being the latest in the Chubb safes product range, the Minibanker incorporates the latest design features from the industry's leading brand name.

Designed in response to consumer demand, the Minibanker is fast becoming one of Chubb safes best selling products. This is no surprise. After all, Chubb safes do design products to meet consumer needs....

KEY FEATURES

- Cash and document protection using highly reliable materials.
- Recommended **£3000** cash rating.
- Tested to offer **30 minutes** fire protection of paper.
- High quality security features ensure that security has not been sacrificed at the expense of price.
- Sizing (410 (H) X 360 (W) X 360 (D)) allows the Minibanker to be installed in locations where spacial constraints exist.

QUALITY FEATURES

FIRE RESISTANCE

In case of fire, the intumescent strips around the opening of the body expand to seal the gaps between the door and the body to provide **30 minutes** of fire protection.

LOCKING

The door is secured by a high security, double bitting keylock which is further protected by a manganese anti-drill plate.

RELOCKING DEVICE

A relocking device is incorporated into the boltwork to provide additional resistance. Should the lock be dislodged during an attack, the device is activated and prevents the door from being opened.

CONSTRUCTION

The entire body has an effective barrier thickness of 65mm constructed from a 2mm thick steel plate inner and outer body encasing Chubb safes high density barrier material. The space between the inner body is filled with Chubb specification concrete, giving a barrier thickness of 61mm.

DOOR

The door is constructed from a 10mm steelplate. The overall door thickness including the lockcase cover is 75mm.

BOLTWORK

The door is anchored to the body of the safe by moving 25mm solid bolts on the leading edge of the door. A full length fixed dogging bar can also be found on the hinge edge of the door.

CASH RATING*

Recommended **£3000** cash rating. Approved by the Association of Burglary Insurance Surveyors.

SOLD SECURE GOLD

Approved by Sold Secure to gold standard for burglary protection. Sold Secure is an independent testing authority approved by the Home Office. Sold Secure Mission Statement:

"It is the mission of Sold Secure to test and provide professional and accurate advice regarding effective security products to commercial customers, the Insurance industry, the Home Office, the Police and the public".

DESIGN FEATURES

SIZE

One size for convenient fitting into restricted spaces.

FINISH

The safe is finished with an attractive light grey scratch resistant epoxy based paint.

DESIGN

Attractive design with Chubb Safes handle allows for comfortable and smooth operation

FINISH

* Cash rating is the amount an insurance company will allow the safe to store overnight. As a general rule, this rating is multiplied by a factor of 10 for jewellery so a Minibanker with a cash rating of £3000 will allow for storage of jewellery worth £30,000 in domestic situations.
